

# DATIM's New Data Import and Exchange Resources Page

## Purpose

To improve interoperability and promote metadata sharing by (1) more widely sharing DATIM's code lists and (2) making it easier to find and use relevant resources for data import and exchange with DATIM.

<https://datim.zendesk.com/hc/en-us/articles/115002334246-DATIM-Data-Import-and-Exchange-Resources>

The screenshot shows a web browser window displaying the DATIM support page. The browser address bar shows the URL: <https://datim.zendesk.com/hc/en-us/articles/115002334246-DATIM-Data-Import-and-Exchange-Resources>. The page header includes the DATIM logo with the tagline 'Accountability • Transparency • Impact' and a 'SUPPORT' button. A search bar is visible with the text 'Search' and a magnifying glass icon. The main content area shows the breadcrumb 'DATIM > Data Import and Systems Administration > Data Import and Exchange' followed by the article title 'DATIM Data Import and Exchange Resources' and the author 'Ping Huang - Friday at 16:35'. The article content includes a 'Purpose' section stating: 'This online guide provides resources and describes procedures necessary for importing and submitting data into DATIM.' and a 'DATIM Concepts' section stating: 'Data intended for import into DATIM must satisfy strict requirements with respect to the format of the data as well the relationship of the data to the current metadata within of the system.'

Data Exchange Guidance

Date	Type	Document	Description
November 23, 2016	SIMS	<a href="#">SIMS 2.0 Data Exchange Exercise Guidance_V2.pdf (700 KB)</a>	Agencies are required to submit SIMS data to S/GAC via the DATIM system on a quarterly basis. This guide serves as a resource for participating agencies to facilitate the process of submitting their SIMS 2.0 data to S/GAC for import into DATIM. Data intended for import into DATIM must satisfy strict requirements with respect to the format of the data as well the relationship of the data to the current metadata of the system. Data must be valid with respect to the organization units, data elements, and mechanisms.  The purpose of this exercise is for participating agencies (CDC, DoD, HRSA, PC, and USAID) to verify and validate the script developed by the DATIM team to correct records containing the same OU/IM/Period combination. This will enforce adherence to the org unit/mechanism /period uniqueness constraint required by DATIM. Note: The script does not alter the assessment date, the integrity of which is important for subsequent analyses.
April 18, 2017	SIMS	<a href="#">SIMS 2.0 Data Import Reference Guide_v6.pdf</a>	The attached SIMS 2.0 Data Import reference guide serves as a resource outlining the steps involved with importing SIMS 2.0 data into DATIM. Reference this guide for all the requirements before Import.
December 21, 2016	SIMS	<a href="#">PEPFAR Data Exchange Implementer Community_SIMS Data Exchange Exercise_v6.3.docx (1 MB)</a>	For Agencies looking to import SIMS data into DATIM, please download and complete the attached Data Exchange exercise.  <b>NOTE: Please ensure you are using the latest version, 6.3, for your data exchange exercises.*</b>

## DATIM Data Import and Exchange Resources

Ping Huang - Friday at 16:35

### Purpose

This online guide provides resources and describes procedures necessary for importing and submitting data into DATIM.

### DATIM Concepts

Data intended for import into DATIM must satisfy strict requirements with respect to the [format](#) of the data as well as the relationship of the data to the current [metadata](#) within the system.

- [Metadata dimensions](#)
- [Format](#)

**Current Code List:** The code lists provides the identifier to be used in the data exchange files i.e. the Codes and UIDs code for MER (Results and Targets/COP), SIMS data elements, Disaggregates/Category Option Combos, Mechanisms and Organization Unit. In addition they contain common names and codes for data elements (Indicators & Disaggregates) and data sets (forms).

- [Data Elements](#)
- [Mechanism\\*](#)
- [Org Unit](#)

\* These code lists are open to the public i.e. you do not need a DATIM log in to access them

**Data Exchange Guidance:** This section provides instructions and useful resources necessary for performing MER and SIMS data exchange with DATIM.

**Archives (old code lists):** This section contains code lists that are not active for current reporting periods.

**Other Resources:** Other useful DATIM and DHIS2 links and resources are provided in this section.

### Metadata dimensions

Data must be valid with respect to the destination sites, periods, indicators, disaggregation and mechanisms, therefore all data values must be associated with four metadata dimensions which describe different aspects of the data namely:
