(November 4) - OpenHIE Academy Intro Courses

Time	Location	Session Description	Presenter (s)	slides *Please post presentation slides here
8:00 - 8:30		Registration		
8:30 - 9:00		Welcome Remarks and Overview of the Academy	Organizer: A raya Medhanyie	
9:00 - 10:00		History of OpenHIE and How to Leverage It	Paul Biondich	
10:00 - 11:00		Academy Course: Intro to HIE and OpenHIE - Concepts and Conventions <i>Are you new to health information exchange and OpenHIE? This course overviews the essential concepts of HIEs and common terms and acronyms used by the community. Participants will enhance their fluency in the field and learn how HIEs are catalysts for data use - and why they are essential for achieving both the SDGs and Universal Health Coverage (UHC). https://wiki.ohie.org/display/documents/Glossary</i>	Instructor: Carl Fourie Facilitator: Rigat Ashebir	
11:00 - 11:30		Coffee Break and Network		
11:30 - 1:00		Academy Course: Introduction to OpenHIE - Architectural Conventions and Standards <i>What constitutes a HIE implementation and what do the images in the OpenHIE architectural framework represent? Participants will take a deeper dive into the OHIE architecture specification and learn how it can be used in part or in whole to establish enterprise data sharing.</i>	Instructor: Jennifer E Shivers Facilitator: Samson Yohannes	
1:00 - 2:15		Lunch and Group Photo		
2:15 - 3:30		Academy Course: All About Registries and Workflows <i>What is the difference between a master facility list and a facility registry? How do private and public health care providers share data? When does a client registry become a shared health record? In this course you will develop literacy about common registries and services in a HIE, the interoperability layer, and how mediators can address many needs for customization.</i>	Instructor: Carl Leitner Facilitator: Tesfaye Gebemeskel	
		Leadership and Governance: Applying Health Information Exchange to Real World Scenarios <i>In this course, participants will engage in discussions of realistic scenarios in which data exchange can lead to better health outcomes, surveillance, and health systems management. Participants will learn how data exchange enhances clinical care, decision support, and M&E.</i>	Vikas Facilitator: TBD	
3:30 - 3:45		Coffee Break and Networking		
3:45 - 4:30		Academy Course: Overview of Global Data Standards <i>What are global standards in health IT? Why do we need them? This course demystifies the complexities of global standards, how they are created, and why they are used. Participants will learn about the institutions involved in the creation and adoption of standards, Regenstrief (LOINC), Health Level 7 (FHIR) and Integrating the Health Enterprise (mCSD, among many others), and understand how standards are used in OpenHIE Architecture Workflows.</i>	Instructor: Luke Duncan Facilitator: Tesfaye Gebemeskel	
		Leadership and Governance: What is a Global Good? <i>This presentation provides an overview of individual Global Goods and how they address specific business domains within the health information ecosystem. How does OpenHIE provide a blueprint, using best practices in interoperability and open standards, for bringing these global goods together?</i>	Carl Fourie TBD (co-leads from other global goods)	

4:30 - 5:00		Wrap up and reflections from the day	Organizer: A raya Medhanyie
