

Home

 This page is currently under construction.

The OpenHIE community is working on projects in the areas of implementation and organizational support. This space provides an overview of these projects and any related sites, if applicable.

Organizational Support

Activities to help provide organizations and countries with best practices and procedures when it come to HIE.

Implementations

The OHIE sub-communities are supporting activities and technologies being used in multiple countries. Projects are taken on using a [country engagement strategy](#) and you can see a list of activities below.
