

What constitutes an OpenHIE IL?

PoC Facing profiles (Support full spectrum of the interfaces but IL will simplify the POC connection by doing logging, etc)

- XDS.b Document Registry and Document Repository
- ATNA - Node Authentication (Authenticating Node)
- PIX - Patient Identity cross-reference manager
- PDQ - Patient Demographics Supplier
- CSD - Service Directory
- AR - Audit repository
- DXF(?)
- ?? FHIR Alert resource or SMTP

Registry facing profiles

- XDS.b Document Source
- PIX - Patient identify source, Patient identify consumer
- PDQ - Patient Demographics Consumer
- CSD - Service Finder
- DXF(?)

Supported workflows

1. [Save encounter workflow](#)
2. [Query encounters workflow](#)
3. [Common message security workflow](#)
4. [Send health worker alert workflow](#)
5. [Aggregate data from the SHR](#)
6. [Send pre-aggregated indicator data](#)
7. Pass through PIX and PDQ messages
8. Pass through CSD messages

Should translate message formats
