  - Guide released and feedback
  - 100% countries with local groups supporting implementations
  - EpiHack like sessions completed
- OHIE and FR specific workflows
  - Workflow drafted
  - Workflows approved and implemented
- FRED API
  - Systems using the FRED API

WorkFlows

-> HMIS and HWR,

-> POC/POS consumption

-> Messaging, referrals

Three Common Patterns, replicated across multiple things

-> Data updated directly in FR

-> Data consumption from a FR

-> Trusted and empowered source sends facility data updates to a registry, curation/existing data collection.
