

# 2014-09-18 OHIE-FR Meeting

**When:** 09/18/2014 at 11:00 AM EDT

**Where:** Google Hangout

**Participants:**

**Recorded Video:**

**Agenda:**

The proposed agenda includes:

- Updates from the recent OHIE Architecture Meeting and how it pertains to the facility registry community (5 min)
- Identification and prioritization of FR workflows to support. A few to get us started as identified from implementers ... How can a FR consume code sets and hierarchy metadata from a trusted source? How can a tool contribute updates to a FR? What about more complex governance patterns for how facility registry data is managed? (~40 min)
- Gauge interest for an "Implementers Call" to pair with this technical call (5 min)
- AOB? (Remaining time)

**Outcomes:**

- Reviewing the workflow process
  - Identify a need
  - Clarify sponsors and core actors
  - Depict as workflows
- Identification and prioritization of FR workflows to support. A few to get us started as identified from implementers ... How can a FR consume code sets and hierarchy metadata from a trusted source? How can a tool contribute updates to a FR? What about more complex governance patterns for how facility registry data is managed? (~40 min)
  - Codesets to a FR .... services, facility type, administrative hierarchy (+++++)
  - Patterns ... Updates to a FR directly or from some existing source (++++)
  - Updating the facility list in the data warehouse via a FR (++)
  - Can a Facility Registry consume Provider Data and vice Versa (CSD?) (+)

Some others to consider:

- Alerts? (Sometimes FRs need to be an index)
- Survey Tool consumers a FR or vice versa

Scenarios of Data Use:

[blocked URL](#)

- Gauge interest for an "Implementers Call" to pair with this technical call (5 min)
  - Would be of value

- AOB? (Remaining time)
