4.4 What is required?

The complex nature of health information exchange begs the question: What if I only have some of the components as represented by OpenHIE? Is it still an OpenHIE architecture project?

- What OpenHIE components are absolutely required to be successful?
    - Client Registry
    - Health Facility Registry
    - Health Worker Registry
    - Interoperability Layer
    - Shared Health Record
        - Shared Health Record Functional Specification
- What components are optional?
