Facility Registry and MFL Literature

There is a growing set of documentation and literature produced on the topic of facility registries and master facility lists. To provide an open resource for implementers and experts on this content, a Mendeley group has been created here. If you would like to join it is free to use. After you join to follow the group, you can review existing research, add new pieces and discuss with other experts in the group. Periodically, we will work to make sure the latest research and documentation is posted here.

To join:

- Step 1: Create an account if you don't have one - it is free to do.
- Step 2: Join the group (https://www.mendeley.com/community/facility-registry-research/)
- Step 3: Follow along and add documents we might have missed.
