

Implementers' Experiences: Liberia's ongoing in-country initiatives to adopt the OpenHIE architectural framework for building the country's HIS

Session Name: Implementers' Experiences: Liberia's ongoing in-country initiatives to adopt the OpenHIE architectural framework for building the country's HIS

OHIE18 Event Page - ohie.org/OHIE18

Time / Room: 12:30 - 1:15 Marquee

Etherpad Link: https://notes.ohie.org/2018-08-01_Implementers_Experiences_Liberia

Notes:

Presentation of mHero, a 2-ways sms app to connect HW and MOH via RapidPro

Use case:

Patient in a facility with symptoms, HW send an sms (alert) which is received by RapidPro who will check if the smformat was respected

A 2nd checking is done before starting the process

Infos in the alert:

Name of the person who sent the alert

The name of the alert ...

Riders (who got a list of facilities) = people who are driving motorcycles to go to the facility and pick the sample and an sms is sent to notify that sampel was picked.

They will bring the sample into the lab and an sms was sent to inform that sample was delivered

Next Steps:
