

Terminology Services Roadmap

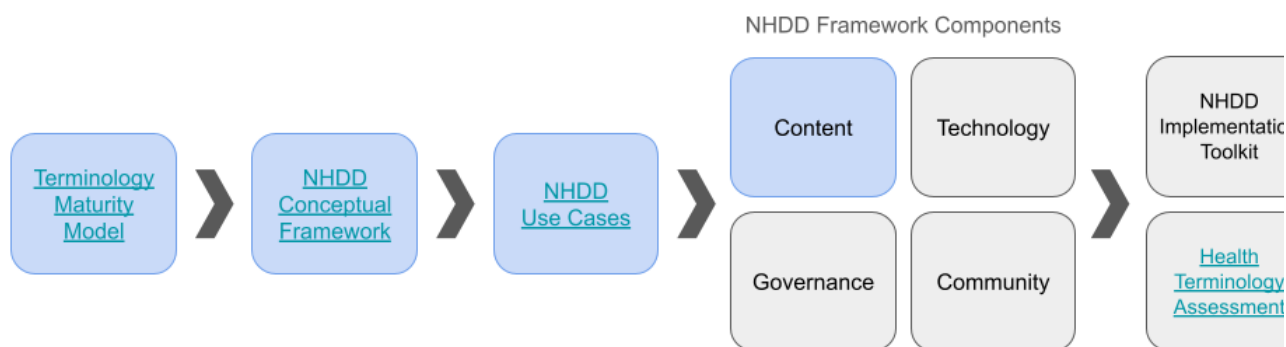

2024 Roadmap

The OpenHIE Terminology Services (TS) subcommunity will be focusing on two particular topics in 2024:

- TS Implementer Showcases: Provides space for implementers to show off work in progress for terminology services, to ask questions to the community, and to help educate us on lessons learned and practical experiences
- National Health Data Dictionary (NHDD) Framework and Toolkit: Collaborate on materials to help countries to start up a robust national health data dictionary.

Below is a basic mini-roadmap with topics that will help guide us on how to tackle the NHDD Framework and Toolkit:

NHDD Roadmap
