

Data Use Community

Welcome to the Data Use Community (DUC)!

The DUC was built to leverage the expertise in clinical care, systems, policy, and data reuse and analysis, along with the field experience available across implementing agencies, ministries, and implementing partners, to create a peer support network of interested practitioners. The DUC's initial focus is on guidance regarding approaches for enhancing continuity of treatment and interruption in treatment. We propose to then extend this tested approach to address other evolving priorities that can only be addressed through individual patient-level data.

The DUC will operate in a collaborative and iterative way to support Ministries of Health and country implementers.

The DUC is initially working towards the following goals:

- Be initiated with founding members with relevant clinical expertise for HIV prevention, treatment, and care, informatics, and data science.
- Consolidate best practices, drawn from country experience, to a generally applicable and context-specific approach to improve continuity of treatment and reduce interruption in treatment, with specific attention to the data and systems approach.
- Ensure field experience sharing, improve interagency coordination and collaboration, and integrate group efforts to support program goals.

Monthly Outlook of Upcoming Meetings of the Data Use Community

The DUC hosts multiple meetings that are open for all to participate and contribute to the work! We will update the below table with these upcoming calls and their relevant details. Follow the community forum for updates on upcoming meetings!

Team Calendars

Summaries, recordings, and meeting materials from DUC Calls are posted to this [wiki page](#).

Zoom Connection Details	Join from computer or mobile: https://datausecommunity.org/meeting Meeting ID: 828 2453 9607 Password: 1
Meeting Title	Session Overview
Identity Management Collaborative Session Wednesday 24 April 2024 at 9 am ET 1 pm UTC	<p>We will continue to discuss what work countries are doing around patient identity management. The goals of these monthly meetings are to:</p> <ul style="list-style-type: none">• Provide space for peer learning on patient identity management.• Build community linkages between teams working on patient identity management.• Begin to gather common practices, challenges and experiences to be documented in the Patient Identity Management Toolkit <p>The Community is always looking for volunteers to share how different countries are linking person level data systems together. Please reach out on our community forum if you are interested in learning more.</p>

Upcoming Conferences and Events

Come connect with the DUC! We will be sending representatives to conferences and events soon!

Shareable Message on the DUC

Do you want to share the DUC with your network? Check out the shareable message below to copy-and-paste to your peers and colleagues.

Hello,

I wanted to reach out and share the [Data Use Community](#) (DUC) with you! The DUC is a network made up of organizations and individuals currently focusing on guidance regarding approaches for enhancing treatment continuity.

I have recently joined this community and thought it would interest you as well. Here are a few ways to start contributing:

- Sign up for the [mailing list](#) and the [community forum](#)
- Check out [upcoming meetings](#) that take place on the 2nd Tuesday of every month with summaries sent out shortly after

I hope we can attend the next meeting together!

Best,

Archive: Former DUC Meetings

As the DUC was beginning to host regular community touch points, we scheduled meetings on a monthly basis along with follow-up calls. As the DUC grew and progressed in their efforts, it became clear these monthly meetings were no longer needed to sustain the work and connection of the community. We now host meetings throughout the month as needed, as it works for community members, and on topics that are timely for the work.

Monthly Community Meetings

The monthly community meetings are the heart of the Data Use Community. This was the original meeting point where the whole community could to come together to discuss and hear the work of this making efforts in-country on data use, HIV prevention and the efforts within the HIV treatment cycle. Each month had a different focus that will be advertised as soon as possible.

DUC Debriefs

The DUC Debriefs were informal sessions, facilitated by the secretariat team to allow for additional collaboration and follow-up conversation on that month's community meeting topic(s).
