- Open Discussion
 - Question: How many times can data be resubmitted?
 - Official Process: One submission that includes all partner data during regular import process, period closes then reopens for cleaning submission to address any issues
 - If data is submitted early, opportunity to review data in Data Genie, DRTs
 - Note that data takes some time to be accessible in Genie
 - Have flexibility with resubmissions, but we request to limit the amount of resubmissions
 - When resubmitting, any time a data value is updated, it invalidates deduplication. Deduplication will need to be done again.
 - Submission should be completed by import deadline to give operating units the chance to review in Data Genie or DRT to determine if resubmission is required, to deduplicate, verify and approve
